AARUSH SHARMA

College Station, TX | 469-558-5428 | aarush_2730@tamu.edu | linkedin.com/in/aarushsharma2730/

SUMMARY

General Engineering student with hands-on experience in mechanical design, prototyping, and testing through rocketry and student engineering teams.

EDUCATION

Texas A&M University — College Station, TX *Expected May 2030*
B.S. General Engineering

Frisco High School — Frisco, TX *May 2026*
High School Diploma

TECHNICAL SKILLS

CAD: Fusion 360, SolidWorks

Programming: Python, Java, MATLAB

Engineering: Mechanical Design, Prototyping, Troubleshooting & Testing, Iterative Design

Hands-On: Model Rocket Construction, Mechanical Assembly

ENGINEERING EXPERIENCE

American Rocketry Challenge & Aerospace Club *Aug. 2023 - May 2025*
Recovery Systems & Engine Research Teams

- Designed rocket recovery and landing components in Fusion 360, validating a shock-cord system through 3–4 test launches.
- Achieved 3 successful test recoveries and a successful recovery at the American Rocketry Challenge (ARC) by applying aerodynamics and structural-stability principles.
- Diagnosed recurring design failures with a 4-person team and implemented iterative fixes to improve recovery reliability.

Texas A&M EcoCAR - Member *Sept. 2026 - Present*
Texas A&M University

- New member of Texas A&M's EcoCAR team, focused on hybrid-vehicle development for off-road performance.
- Building foundational knowledge of vehicle architecture, propulsion, and mechanical integration.

ASME Go-Kart Design & Build Program *Aug. 2026 - Present*
Texas A&M University

- Participating in ASME's go-kart design and build program, applying mechanical design and fabrication skills.

ENGINEERING ORGANIZATIONS

American Society of Mechanical Engineers (ASME) - Member *Aug. 2026 - Present*

- Engaging with fellow mechanical engineering students through ASME activities and project opportunities.

LEADERSHIP EXPERIENCE

Nexify Initiative — Executive Team / STEM Podcast Manager *Dec. 2024 - May 2026*

- Produced 5 podcast episodes, conducting interviews with industry professionals in STEM fields.
- Translated technical topics into accessible content for a student audience, planning guests and episodes with the executive team.
